Be there at **14:15** for the surprise → *Esprit Libre*

Cocktails at ~ 16:45 → in the restaurant upstairs

Annette Cottet is available to answer any questions you may have

Our 2018 seminar was motivated by the need to gain
a better understanding of the social
and health issues in our country

séminaire
pratique-sante.ch

Our questioning comes from the following observations

- Switzerland has had an unsatisfactory health financing system for over 30 years!
- Our social and health institutions have a number of important concerns
- The population is clearly worried...
- By whom and especially how will we be given medical care tomorrow?
 - We are told that there will be staff shortages in the sector for 2025 and beyond
 - The 2020 funding model for the rehabilitation sector is uncertain
 - Insurance premiums are increasing with a complete lack of transparency for the general public

Can we

draw inspiration from other organizations,
other systems, other countries?

Finally, remember that this seminar is a training action, which means it is a free space for comparing and sharing ideologies and interests...

**Don't hesitate to discuss these issues with
our speakers and with each other!**
